We have been noticing a sizable increase in storm water showing up in the sanitary sewer lines, particularly in the west side of town. During normal operations, the current sanitary sewer system has more than adequate capacity for the sewer flow. Similarly, Montvale's separate storm sewer system typically has more than enough capacity to convey groundwater

from private property and public street inlets safely and efficiently.

However, stormwater inflow from illegal hookups and groundwater infiltration from leaky pipe joints have created harsh demands on the sanitary system during major rain events. We have devoted substantial staff hours and capital resources to mitigate the situation. Such inflow and infiltration have also caused backups in floor drains and basement plumbing fixtures when the volume of groundwater in the sanitary system exceeds its capacity.

This is not only costly in terms of sewage treatment expenses, but it is overloading our pump stations at Valley View Terrace, Huff Terrace, and Middletown Road. The two systems should not be intermixed. Often, however, homeowners have illegal sewer connections that they may not even be aware of.

### The Mayor's Corner

Illegal Sewer Connections include connections from sump pumps, floor drains, roof leaders and any other systems that convey stormwater, groundwater, roof runoff, subsurface drainage, foundation drainage or cooling water into the municipal wastewater system.

Mayor Mike Ghassali

In the next few weeks, we will be doing smoke tests on our sanitary sewer lines, starting near the Valley View pump station. The smoke will be pumped through the sewer lines in 1000 feet intervals. If an illegal sewer connection is present, smoke will be released from the line and the homeowner will see it coming from a sump pump, roof drain, or other similar connection. We will have numerous emergency services personnel, Colliers employees, and other resources to track the smoke and work with the homeowner to mitigate the issue.

Prior to any smoke testing, we will be notifying all potentially-affected homeowners so we do not cause a town-wide panic. I strongly encourage you to check your roof leaders, sump pumps and other storm drains and ensure they are not connected to the sanitary sewer system. If you do find any illegal connections, please contact the Building Department who can help you work through the process to remedy the situation. Both the Borough and your neighbors thank you for taking this matter seriously. No date has been set as of yet, but this is necessary and as mentioned, you will be notified when the test is ready.

Mayor Mike Ghassali

## Property Maintenance

Please remember that once the snow starts to fall, it is the responsibility of the property owner to remove ice and snow from all sidewalks that front on all sides of your property. Sidewalks must remain passable at all times. This can be a frustrating endeavor as plows go by and plow in what was just shoveled. It is important to remember that roadways are the priority in order for emergency vehicles to move about town. Removal of snow soon after a snowfall will reduce the potential for it to turn to ice and be more difficult to remove later on. By doing so, we will be able to provide safe and passable sidewalks during the upcoming winter. This is extremely important as pedestrians and school students that use sidewalks to access public transportation and are not forced to use the streets as a pathway. Snow removal issues arise each year especially when we are hit with a great deal of snow throughout the course of the winter.

Kindly make sure your contractor is aware of the borough requirements regarding snow removal as the property owner is ultimately responsible for their compliance. By all of us doing our share on our respective properties, we can help to keep Montvale safe for all pedestrians on our sidewalks.
