12	this project. And I would like to have it marked into evidence as part of the record.	12	MR. HIPOLIT: He calls it an EIS, but
13	MR. REGAN: I think we're up to A-23.	13	it's more, it covers so it covers in more detail, than a waiver, a lot of Environmental Impact issues,
14	CHAIRMAN DePINTO: Why don't we mark it	14	but I still think it falls under request for a
15	into evidence as applicant exhibit, what is it?	15	waiver. I think they submit that document as in
16	MR. REGAN: A-22.	16	evidence. I have it.

The impacts of the pervious area, improved drainage and more landscaping is much less intense than the commercial site so you recommend a waiver. I think MAP describes it very well and they're very detailed on it, but, yeah. That's fine. I would definitely recommend it. I will accept it without revision and in the same case it's really more this is more of a waiver. MR. REGAN: Do we have a copy of that document? MR. VOGEL: Do I have it with me? Yes. MR. And, again CHAIRMAN DePINTO: And the reasons for that recommendation? MR. HIPOLIT: Right. The reasons are very similar to the last application. You have a commercial site, the commercial site is being converted to a residential site. The impacts of the pervious area, improved drainage and more landscaping is much less intense than the commercial site so you recommend a waiver. I think MAP describes it very well and they're very detailed on it, but, yeah. That's fine. I would definitely recommend it. I looked at both the 2008 last comprehensive Master Plan as well as the more recent 2016 Master Plan re-examination report. The 2008 Master Plan designates the site for office/research use. The plan contains a certain number of goals, objectives and policy statements.

1 Those that are pertinent to this case 2 include those that talk about creating housing 3 alternatives for residents of the community. It 4 talks about specifically encouraging a more diverse 5 range of residential occupancies for the change in 6 population of the community. It talks about 7 encouraging high-quality design and encouraging an 8 increased taxable ratable base. 9 The 2016 plan, excuse me,

10 re-examination report reaffirms all of those goals 11 and objectives.

But what's interesting, it talks about the change in nature of office research development in the community.

It recognizes there's been a number of 16 changes overall in the community. And it actually raises the question about the viability of the office research districts based on all that has taken place between 2008 and the present.

20 It also points out that in the very 21 beginning of 2016 the zoning ordinance was amended to 22 permit nursing homes in the O.R. zone. And because 23 of that, it also makes the recommendation that 24 assisted living facilities be identified as a 25 permitted use in the O.R. zone. It, along with that,

LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

1 points out that one of the benefits of assisted 2 living, not just the nursing homes, is that you can

The zoning ordinance is consistent with these Master Plan recommendations, the site is in the O.R. zone. The permitted uses include research labs, offices, medical labs and nursing homes and hospitals as a principal permitted use allowed as-of-right and it also identifies assisted living facilities as a conditional use provided 10 percent of the beds would 12 be Medicaid beds, thereby enabling the municipality to get affordable housing credits for those beds.

14 Now there are, in the zoning 15 ordinances, 14 different conditions associated with 16 assisted living facilities. We meet 11 of those 17 conditions. We do not meet three of those 18 conditions. And those three conditions relate to 19 building height, FAR and a buffer requirement.

20 The building height overage is not 21 related to footage. It's related to storage. How 22 the ordinance permits a three-story, 50-foot tall 23 building. We are proposing a four-story, 24 49.87-foot-tall building.

In terms of floor area ratio, as I LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C.

201-641-1812

1 mentioned earlier, a floor area ratio of 41 percent

2 in contrast to the code that permits up to 35

3 percent.

4 And in terms of the buffer requirement, 5 they are required to have a 15-foot buffer on the 6 perimeter of the site. In the rear portion of the

7 site we do not have a buffer. The existing driveway 8 comes right up against the rear property line and we

9 are continuing that condition with -- with the use of

10 that existing circulation aisle.

11 In addition to those conditions of the 12 conditional use, there are a number of -- four 13 categories of noncompliance with the conventional 14 area and bulk requirements. One relates to the 15 structure height of an accessory structure. You're 16 allowed to have a 12-foot height for accessory 17 structure. We are proposing a 14.83-foot building 18 height to that accessory structure.

A retaining wall height is allowed to be 4 feet in height. We have a retaining wall, multiple-step retaining wall height that the total is 13 feet in height.

23 And then we have -- for signage we have 24 three associated variance requests. One is regarding 25 the freestanding sign, itself. The code permits a

19

20

21

22

14

16

1 freestanding sign to be 32 square feet. Our sign, we're counting the entire base around the sign, is 92

square feet. The sign height is 7.75 feet whereas

4 you're allowed a 6-foot height.

5 And your ordinance only permits two 6 colors to a sign and we are proposing a total of six. 7 There's a question about that because I think we have 8

a stone base on two sides of the sign and I believe

9 that was counted as part of the color, but it's just

10 a basic stone wall.

11 In addition to that, your code permits 12 no more than 15 percent of the parking spaces 13 proposed to be located in the front yard. We are at

14 17 percent, basically five spaces in excess of what 15 is permitted by code.

16

Now in terms of the statutory code and 17 I know this board is very familiar with that burden, 18 interestingly enough there's quite a number of 19 different issues associated with this particular

20 application.

21 In terms of the positive criteria one 22

can argue either you're an inherently beneficial use or the site is particularly suited for the use.

24 Obviously consistent with case law we 25 are saying we are an inherently beneficial use. The

> LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

23

When one argues that they're an 13 inherently beneficial use there's the four-part Sica test that one has to go through, and I'll go through that in a moment.

In addition to that, as I mentioned earlier, we do not comply with certain conditions of the conditional use. The Coventry case comes into play. And then other specific cases have to also be addressed because we have the building height and the FAR variance. And I'll get into each of them in a moment.

23 In terms of special reasons, the courts 24 have said, if you're an inherently beneficial use 25

that alone accounts for your special reason. But you

LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

1 have to address that four-part Sica test. The first prong of that test one has to show or identify the 3 public interest which is at stake.

In this instance, it's the ability to address the needs of a growing, aging, frail population in our region.

The demand in the region is increasing according to DCA statistics. Assisted living demand is anticipated to increase by 16 percent over the next five years.

11 In terms of memory care, the demand is 12 supposed to increase by 18 percent in that five-year 13 period.

Interestingly enough, with the issue of memory care, most of the memory care facilities that exist in Bergen County today are 20-plus years in age and they do not contain all the contemporary features that are sought after in memory care today.

In terms of the demographic trends, we are a continually aging population. The Department of Health and Human Services estimates that there's a -- 2 percent of the population over the age of 60 is in need of long-term care.

24 In addition to that, Bergen County and 25 Passaic County combined estimate by the year 2030

> LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

those two county's population will increase to close 1

2 to 1.5 million people.

3 Now that's interesting because -- and I 4 purposely used Passaic County in addition to Bergen 5 because the data shows that many Passaic County 6 residents end up in health care facilities in Bergen 7

8 The data also indicates that by 2030 9 there will be a need for about 7,800 beds to serve 10 the population.

11 Right now the projection is, unless 12 there's a significant change, there will be about 13 5,500 beds available. So we are significantly -- we 14 will be significantly short of what the demand will 15

16 The second prong of the Sica test is to show what is the -- or identify the detrimental 17 18 effects that will accrue from this project if you 19 were to grant the variance.

20 And typically one argues the issues of traffic when we talk about detrimental effects of the 21 22 use and intensity of use.

23 Well, in this particular -- with this 24 particular use the amount of traffic generating 25 potential is dramatically less than if the site were

LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

20

19

1 to develop for maximum -- excuse me -- for permitted 2 principle use, offices, medical offices and the like.

So I don't think traffic generating 4 potential is an issue.

5 In terms of intensity of use, the 6 ordinance permits an impervious coverage of 38 7 percent whereas we're at only 17 -- excuse me. The 8 ordinance permits 50 percent impervious. We're at 38

9 percent. However, number of residential units are a 10 density basis. You permit 25 residential units per

11 acre. We're at only 17.69 units to the acre. So in

12 terms of intensity of use, we're much less than

13 what's contemplated by code.

14 The third prong of the Sica test says 15 you have to identify what reasonable conditions can 16 be imposed to address those negative effects that 17 you've just mentioned.

18 But in terms of the site design, as you 19 heard at the previous meeting, our circulation system 20 works well. The parking configuration works well,

21 the access out to the street and the visibility

looking left, right down Summit all works well. 23 So there's no need to do anything in 24 addition, to impose additional conditions to ensure 25 the reasonable use of this property at this location.

> LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

22

And then, finally, the COAH -- excuse 2 me, I do a lot of COAH work.

The Sica test says you have to weigh the positive and the negative criteria and determine, on balance, whether there's a substantial detriment to the public good.

And in this instance the public good obviously is affirmed by providing the assisted living and memory care and the related activities. The use is certainly compatible with the residential development across and down the street. There's less traffic from this using principal amenities 13 as-of-right and the balance that we talk about in the end is a provision of a use that is needed in the community against the loss of one site for office use where you have a Master Plan that already says that office uses are no longer in vogue as they once were.

18 In addition to all that, we have the 19 issue of the FAR, the conditional use variance, that 20 we're not meeting all the conditions and the height. 21 So -- and for that, there is three different bases 22 that come into play. There is the Coventry case, the 23 Grasso case for height and the Randolph Town Center 24 case for FAR. They all kind of blend together.

> What has happened is, quite a number of LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

1 years ago in Westwood there is the Coventry case. 2 Those who might not be familiar with it, actually I was the planner on the application, my client had proposed 360 units on Old Hook Road just west of the

hospital where the bus depo used to be. We got an 5

6 approval for 360 apartments. We did not meet one of 7

the conditions of the conditional use. That 8 condition was that we needed a front yard setback

9 equal to one-third the depth of the lot.

Now that's all well and good when you have 150 or 200 foot deep lot. My client's property 12 was over 1,400 feet deep. We needed more than a 300 foot front yard along Old Hook Road. And we argued that on the face of that that's kind of silly but, more importantly, we also argued that the site truly

functioned well irrespective of not meeting that condition. Coventry Square, the apartment building across the street didn't want the competition of 360 additional rental apartments, appealed the board approval. We lost at the lower court. He lost at the appellate court. The Supreme Court ruled that both again supported the application, but also said that the rationale that was offered that the site

worked well irrespective of not complying with that LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

condition should become the law of the land for all 1 2 conditional uses.

Subsequently, that same rationale was 4 applied to building height. You might not meet your

5 building height, but the issue is, does the site

6 function well irrespective of not compliant to code. 7 And then the same issue or the same thought process

8 was applied to FAR variances and in the Randolph Town

9 Center case.

3

10

11

12

13

14

So we have this philosophy that says when you don't meet these standards, does the site function well? Well, here we have a situation where the building is set back hundreds of feet from the street.

15 So in terms of the building height --16 and we do comply to your footage height, it's just the story count that doesn't comply. Visually it 17 18 won't have the impact that it would if the building, 19 for example, were set 50 feet off of the street.

20 The same holds true with the FAR. 21 Given the modest increase of intensity of floor space 22 area and what's permitted by code, given the fact 23 that the building is set back 500 feet from the 24 street, suggests that it ameliorates, to a large 25 degree, the visual impression of that noncompliance.

LAURA A. CARUCCI, C.S.R., R.P.R., L.L.C. 201-641-1812

24

1 One of the other issues that typically 2 we would raise on these points is how we further the purposes of the Municipal Land Use Law. And in this 4 instance -- excuse me -- of the Master Plan -- I have 5 already touched upon four of the issues that we do 6 affirm in the Master Plan.

7 In terms of the negative criteria, I 8 don't think there's a substantial detriment to the 9 public good because the proposed use represents an 10 enhancement to the public good for all the reasons 11 that I've mentioned. And I don't think there's a 12 substantial impairment to the intent of the Master 13 Plan when you have a Master Plan that acknowledges 14 that the O.R. zoning needs refinement because of the 15 decrease in office space and office usage and the 16 fact that the Master Plan made a specific 17 recommendation that this use should be permitted in the O.R. zone. 18

19 In terms of the bulk standards that we 20 do not comply with, in nearly every instance it's a 21 function of an existing condition and that we're just 22 continuing, doesn't represent a new condition. 23

The one area of new condition is that 24 accessory structure. You're permitted 12 feet. 25 You're allowed 14 and we're proposing 14.18 feet.

I would strongly, again, urge the board to consider their stance on EFIS. It's a product that I can understand if it was the majority of the facade that you would have a concern with. These are highlights to the facade versus using plaster. I've checked with the American Plaster Association. They will tell you, that if you use that product in the northeast, it's not a matter of if it will crack, it will definitely crack because it does not stand up to the thermo expansion and contraction in this climate. So the EFIS is a product that's attempted to simulate a plaster-look in a portion of the building. It's a small portion of the building. We have used it on multiple projects with great success. And, again, we would ask that you would reconsider that request. MR. VOGEL: The front of the building is all brick.
